FOR UNIVERSITY & COLLEGE CAMPUSES

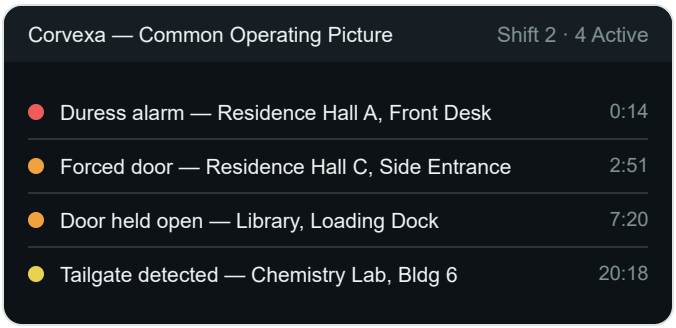

One picture. Every building. Every student, faculty member, and visitor accounted for.

Corvexa correlates video, access control, duress alarms, and life-safety systems across your entire campus — academic buildings, residence halls, athletics, and parking — into a single real-time operating picture, with the right response procedure attached automatically.

Why campus safety needs this

A university campus runs like a small city — open to students, faculty, staff, families, and the public, with its own police department and its own reporting obligations. Your systems already see all of it — they just aren't talking to each other.

- Access events and camera activity correlated automatically, and duress alarms routed straight to the queue — not separate alarms
- Residence hall, lab, and academic building access managed consistently across the whole campus
- The same escalation and notification procedure every time, whether it's a quiet Tuesday or a home football weekend
- A complete, exportable audit trail to support Clery Act reporting and campus safety committee review

Built for a campus, not a building

The same seven-capability platform, focused on what running a residential, semi-public campus actually requires.

Correlation & Classification

Forced-door, tailgate, and camera events fused into one incident anywhere on campus — severity assigned automatically.

SOP Workflow Engine

The same escalation and notification procedure every time — campus police, RAs, facilities — not tribal knowledge.

Unified Console

One queue for academic buildings, residence halls, athletics, and parking — not a console per department.

Open Connectors

Built to integrate with the access control, video, and alarm systems installed across campus; emergency phones connect through the same connector framework.

Lifecycle & Audit

An append-only record of every incident, built to support Clery Act reporting and after-action review.

Reporting & Analytics

Shift and incident reporting for campus safety, housing, and the board of trustees.

Visitor Management

Kiosk check-in, check-out and watchlist screening for tours, conferences, and campus visitors.

See it running across your own campus.

Turn the page for a real scenario, Clery Act fit, and how to get started.

A day in the life

RESIDENCE HALL FRONT DESK — 1:03 AM

A duress button is pressed at a residence hall front desk. Corvexa pulls the nearest cameras automatically, classifies it as a **critical incident**, and attaches the campus's SOP — dispatch the nearest patrol immediately, notify the on-call resident advisor, confirm campus police are on their way — before the alert ever reaches a phone. Campus police arrive in under two minutes and confirm the student is safe. The full record — every event, every action, every timestamp — is already in the audit trail for the department's crime log and the next campus safety committee meeting.

Clery Act & campus safety support

Campus security isn't just operational — for Title IV institutions, reporting and recordkeeping obligations apply, and consistent incident records help.

Exportable Incident Records

Append-only incident records that support your own Clery recordkeeping — they supplement, not replace, your campus crime log.

Consistent Notification Procedure

The same escalation and notification path every time — a real, repeatable process.

Residence Hall & Lab Access

Consistent access control across housing, academic buildings, and labs.

Multi-Department Consistency

One picture across campus police, housing, and facilities.

Software + Consulting

We don't just license a platform. We help you run it.

Site Assessment

Survey every building across campus and build a roadmap.

Systems Integration

Build connectors for access, video & emergency phones.

SOP Design

Author procedures with campus police, housing & facilities.

Deployment & Training

Phased around the academic calendar — never during move-in or finals.

See Corvexa running across your own campus.

Bring your building list and subsystem inventory — we'll scope a demo around your campus.
